The alternative electroplating series from **hsa**

---

**hsa** Helio Service Ahaus GmbH supplies a completely new electroplating series for gravure form production.

*News from hsa: Rotoplater Classic Line*

The **Rotoplater Classic Line**, which is operated by the decor printer Interprint since January 2018 at his plant in Yegoryevsk near Moscow, enables copperplating and chroming of gravure cylinders.

*Chrome tank (left, with 2 rectifiers) and Copper tank*

---

**Here is an overview of the outstanding features of the tanks:**

- Chrome tank completely made of titanium
- Copper, Dechroming and Degreasing tanks made of polypropylene

*Degreasing tank: degrease, decap  
if necessary, applying separation solution*

*Dechrome tank*

- Lid and side panels are double protected against corrosion: they are made of stainless steel and additionally powder-coated
- High quality pumps ensure high availability
- Rectifiers are extremely compact, because they are designed as switching power supplies in a modular design
- The chrome tank has one rectifier for each cylinder side, which ensures extremely even current distribution
- Touch PC, Siemens PLC and the electronics represent the state of the art
